Public Drinking Water Compliance Testing

The goal of every Public Water Supply is to provide clean, safe water to customers. To help Public Water Suppliers achieve this goal, the State Environmental Laboratory offers Drinking Water Compliance testing in accordance with EPA and State regulations. Individual tests may be requested, or tests may be requested as a group. In addition, the laboratory reports drinking water compliance results electronically to the Montana Department of Environmental Quality.

Drinking Water Compliance Analytical Costs

| | Compounds |
|--|-----------|
| | |
| | |

| DW508SL | \$ 28.00 |
|---------|----------|
| DW515 | \$180.00 |
| DW525 | \$325.00 |
| DW531 | \$207.00 |

|--|

| Arsenic | \$21.00 |
|---------|---------|
| Arsenic | \$21.00 |

Phase II Inorganic Compounds

| I made in middle Compounds | á |
|----------------------------|---------|
| Barium | \$11.00 |
| Cadmium | \$11.00 |
| Chromium | \$11.00 |
| Fluoride | \$20.80 |
| Mercury | \$51.00 |
| Selenium | \$21.00 |

Phase V Inorganic Compounds

| Antimony | \$21.00 |
|-----------|---------|
| Beryllium | \$11.00 |
| Nickel | \$11.00 |
| Thallium | \$21.00 |

Other Tests

| Total Coliform Bacteria | \$21.00 |
|-------------------------|---------|
| Nitrate + Nitrite | \$17.50 |
| Lead & Copper | \$32.00 |

Disinfection By-products

| Haloacetic Acids (HAA5) | \$180.00 |
|------------------------------|----------|
| Total Trihalomethanes (TTHM) | \$125.00 |
